2267927 - Error message "CSapEditorCtrl::GetObject: Object <number> does not exist" with SAP GUI 740 Patch 5 or above

|			
Version	8	**Type**	SAP Knowledge Base Article
Language	English	**Master Language**	English
Release Status	Released to Customer	**Category**	Problem
Component	BC-FES-GUI (Graphical User Interface)	**Released On**	22.01.2019

Please find the original document at **https://launchpad.support.sap.com/#/notes/2267927**

Symptom

After upgrading to SAP GUI 740 Patch 5 or above (including GUI 750), the following popup is displayed when performing certain transactions:

Environment

SAP GUI 740

Cause

- This issue is the result of removing the "Controls for the SAPscript Legacy Text Editor" component (called the "SAPSCRIPT LEGACY TEXT EDITOR") from the client.

- The "SAP Script Legacy Editor" was removed because it is an obsolete component and has been replaced by the "MS Word as SAPScript Text Editor".

Resolution

- The solution for this issue is documented in SAP Note 2192210.

- There are two options to resolve the issue:

  1. Download the older version of the "SAPscript Legacy Text Editor" from the SAP Software Download Center.
     Then, repackage it with SAPGUI. For more details, please see SAP note 2221815 - SAPscript Legacy Text Editor controls are not packed in SAP Windows GUI Installation.
  2. Configure your system to use the new MS Word Editor:
     - To do so, follow SAP note 742662 - MS Word as Editor in SAPscript and Smart Forms
     - For help with configuration of the MS Word editor, please open a support incident under

the BC-SRV-SCR component.
